SUMMARY OF FATAL ACCIDENTS

1958

Mr. William Fann, married, seven dependent children, was killed at the United Electric Coal Company, Fidelity Strip Mine No. 11, located at Du Quoin, Perry County, Illinois, at 9:15 a.m. January 10, 1958. Mr. Fann was crushed to death when a water sprinkling truck, which he operated, ran over him. He was 52 years old and had been employed at this mine 20 years and 4 months.

Evidence showed that Mr. Fann had stopped his truck on a grade about 50 feet from the coal yard gate. For some unknown reason, he got out of the cab of his truck and stepped upon the fuel tank back of the cab of the truck. He slipped and fell in front of the wheels of the truck. The truck moved forward, running over his body, killing him instantly.

Mr. Kenneth Rose, age 41, married, two dependent children, employed as a face boss, was fatally injured at the Freeman Coal Mining Corporation, Crown Mine, located at Farmersville, Montgomery County, Illinois, on February 3, 1958, at 9:45 p.m. due to a roof fall while reinforcing the roof at the intersection at the last crosscut in the 11 north off the 14 east. Mr. Rose had 7 years and 9 months experience at this mine.

The 11 north entry had been completely barred with steel bars approximately five feet apart up to the face of the entry. The top at the intersection of the last crosscut started to move and Mr. Rose had taken two timbermen to reinforce this intersection. While they were putting up a bar in this intersection, a leg on the left side kicked out from the stringer bar, causing the weight of the roof to knock out seven stringer bars and two collar bars which caused a roof fall in this entry 27 feet long, 21 feet wide, and approximately 6 feet deep, catching Mr. Rose approximately under the center of the fall, killing him instantly.

On February 14, 1958, about 9:20 a.m., Mr. Herman Johnston, age 48, married, one dependent child, came to his death due to a fall of rock and coal at the Old Ben Coal Corporation, Mine No. 14, Buckner, Franklin County, Illinois, where he was employed as a main line track layer. He had worked at this mine for 8 years.

The face boss, on the second shift, had held over his cutting machine men to cut a new loader head in the second crosscut from the face. They cut the loader head from inside the mouth of the crosscut across the 11 south entry 14 by 9 feet wide, starting under the top coal and angling the cut into the roof until they reached a height of 2 feet 8 inches at the end of the cut. They cleaned up the coal and rock, and

the boss left a note to the mine manager saying that the new loader head was cut and cleaned and needed to be roof bolted.

In the morning, the mine manager told Frank Lethiot, a roof driller, to take Herman Johnston and go into the 11 south, 15 northeast and bolt the new loader head. The roof drillers drilled and set two roof bolts in the south side of the loader head and moved the machine over to the north side of the loader head to start drilling when a piece of rock, weighing about one ton, fell on Herman Johnston, knocking him down, causing injuries from which he died while being taken out of the mine.

Mr. Robert Shannon, age 60, married, no dependent children, was killed at the Wilcox and Verna Coal Company, Petersburg, Menard County, Illinois, on February 20, 1958, at approximately 9:15 a.m. while caging rock and coal. Mr. Shannon was employed as a motorman and cager. He had three years experience at this mine.

Mr. Shannon was caging rock on the north cage, and when rock is being dumped, the south cage stops 63 inches above the cage seats on the bottom. When dumping rock is completed, the engineer lowers the south cage onto the cage seats at the bottom on the same signals that is given to hoist the rock. The engineer did not receive any more signals from Mr. Shannon. He contacted Mr. John Verna, who was underground, and told him that something was wrong because Mr. Shannon had stopped caging coal. Mr. Verna went to the bottom immediately. He found Mr. Shannon under the south cage.

Mr. James Adam Martin, employed as a drill helper on a 50 R high-wall drill, was fatally injured by electricity, August 14, 1958, at 7:45 p.m. at the Truax-Traer Coal Company, Strip Mine No. 2, located at Pickneyville, Perry County, Illinois. Mr. Martin was 43 years old and had worked for this company seven years. He leaves a wife and two children as dependents.

Mr. Martin was helping move the high-wall drill. The ground at this place was very wet and muddy. The power cable to the drill partially blew up, causing a phase to earth ground, which did not knock out the automatic circuit breaker. The deceased walked around the front of the drill and caught hold of the hand rail leading to the machine and was knocked down. As he fell, he struck his head on a cable hanger on the side of the machine. He was not in contact with the machine after he fell.

Mr. Earl Rix, age 53, married, two dependent children, employed as a drill helper, was killed at the Carmac Coal Company, Delta Strip Mine, Marion, Williamson County, Illinois, on September 23, 1958, at 3:15 p.m. He had 14 years experience at this mine.

About 3:15 p.m., the day shift was completing the shift. They had 22 overburden shots in three rows wired with delayed detonators, first, second, and third row respectively. As these shots were fired, Mr. Rix, the drill helper on the second shift, was in the shanty with Mr. Kennedy, a driller. Mr. Roberts, bull dozer operator, was on the outside about eight feet from the shanty and the shanty was about 100 feet from the nearest shot. Mr. Norman, drill foreman, was about 100 feet from the nearest shot in the opposite direction. As the shots were fired, two of the shots blew, as they occasionally do. The debris from these two shots scattered up and around the immediate area. About three pieces of the debris, which consisted of wet clay only, traveled toward the shanty and one piece, weighing approximately 100 pounds, fell on the roof of the shanty, breaking a 2 x 4 rafter and the shiplap board with which the roof was decked, falling on the deceased, breaking his arm and knocking him on a steel container in the shanty, cutting his artery and jugular vein.

The shanty is used to store tools and material. It is also used by the men that operate the drill to change clothes. It is on skids and is moved with the operation.

Mr. Francis Burl Wilson, employed as a repairman, was killed at the Moffat Coal Company, Murdock Mine, Murdock, Douglas County, Illinois, on September 29, 1958, at 1:10 p.m. Mr. Wilson was 54 years old and is survived by his widow. He had five years experience at this mine.

The deceased and his buddy, both repairmen, were changing a set of trucks on a 10-ton locomotive. They had raised one end and had cribbed it up with 4 x 6 timbers. The end on which they were changing trucks was jacked up and a 5 foot long 80-lb. rail was put under it supported by similar timbers. The defective trucks had been removed and good ones were substituted. The men had a crib on top of the locomotive and were going to raise the trucks in place with a hoist. As there was some interference, the deceased got under the locomotive and called to his buddy to raise the truck a couple of notches. When it was raised one notch, the supporting rail broke and the locomotive fell, killing Mr. Wilson instantly.

Mr. Eddie Powell, employed as a foreman, was killed by falling rock at the Bell & Zoller Coal Company, Buckhorn Mine, located at Johnston City, Williamson County, Illinois, about 6:15 p.m. November 10, 1958. Mr. Powell was 51 years old and had worked for this company 21 years. He leaves a wife and one child as dependents.

Ped Walker, motorman, left the bottom about 3:00 p.m. with an eight car empty trip and when the trip passed over the 2 main east switch, the fifth car wrecked. The motorman evidently did not know

the car was off the track and pulled the trip through the 1 main east switch where the cars knocked the support from under four crossbars.

The second production shift did not work. However, Guy Robinson, night mine manager, had a crew of men working on the east end of the fallen bars. About 6:15 p.m. Eddie Powell, Ward Padgett, Richard Vick, Walter Klein and John Humsick walked around the fall on the wrecked cars to look the job over and decide the best way to clear the haulage road.

Padgett and Humsick were standing at the end of the car and Powell, Vick and Klein were standing beside the car in a crosscut when the roof at the brow of the crosscut chipped along the rib. Padgett and Klein yelled "watch out". Klein and Vick ran into the crosscut. Powell started to run, however, he was caught under the fall of rock. The rock was approximately 11 feet long, 4 to 5 feet wide, and 2½ feet thick.

Mr. Earl B. Vaughn, age 52, married, no dependent children, came to his death by injuries received in a roof fall at the Freeman Coal Mining Corporation, Orient Mine No. 3, located at Waltonville, Jefferson County, Illinois, at 10:10 p.m. on December 8, 1958, where he was employed as a buggy operator. He had worked at this mine three years.

The fall was about 30 feet x 14 feet and consisted of 2 feet of top coal and 3 to 4 feet of rock. It was necessary to load several buggies of the fall before the body could be removed. The deceased was still sitting on the buggy, when uncovered, indicating that there was no warning the roof was going to fall. The loading machine operator was trapped at the face and retreated out over the fall about ten minutes later uninjured.

The room, crosscut intersection, and at least part of the crosscut had been roof bolted and safety and breaker props had been set in compliance with the timbering rules established at this mine. Inasmuch as the fall was in excess of 5 feet in thickness, it probably would not have made any difference how many bolts were used because the roof broke over the top of the bolts.

ANALYTICAL LABORATORY

The Analytical Laboratory of the Department of Mines and Minerals is located at 413 East Main Street, West Frankfort, Illinois. The Laboratory was established in January of 1948, and temporarily located on the University of Illinois campus. In June 1952 the Laboratory was moved to more permanent quarters in Springfield, Illinois, where it remained until destroyed by fire December 10, 1953.

In May 1954 the Laboratory was moved to West Frankfort, Illinois. The establishment of the Laboratory at West Frankfort, Illinois was a geographical move which enabled the Laboratory to give quicker service to State Mine Inspectors and Mine Operators. The West Frankfort area is the center of the largest coal producing field in the State of Illinois.

In establishing the Laboratory in January 1948, Illinois became the first State to operate a Laboratory of this type, in connection with its mining department. At the time of the establishment, a study of the Federal Bureau of Mines Laboratory was made and the Department Laboratory adopted methods of analyses and equipment similar to that used by the Federal Bureau of Mines. The Laboratory now has the very latest of modern laboratory equipment.

The purpose of the Laboratory is to analyze for explosive, noxious and gaseous mixtures in the mining industry. The Laboratory also analyzes mine dust for the determination of the percentages of combustible and incombustible material; thus, aiding the mining industry in the control of flame propagating characteristics of mine dust. Samples of gaseous mixtures may be analyzed and the results reported to the State Mine Inspector within one hour after the samples have been delivered to the Laboratory. In time of emergency, such as mine fires or the sealing of fire areas, the resulting analyses aid inspectors and management in determining procedure to be followed in eliminating the emergency.

During the year 1958 there were 2,856 mine atmosphere samples analyzed and 3,554 coal dust samples were analyzed.

The Laboratory personnel consists of ten employees:

George W. Sneddon, Supervisor, 411 North Horn, West Frankfort, Ill.
John N. Mitchell, Lab. Technician II, Route 2, West Frankfort, Ill.
Earl Brookshire, Lab. Technician II, 222 Dobson Street, Carterville, Ill.
Bernice Smothers, Lab. Technician II, Route 1, West Frankfort, Ill.
Eulah Rogers, Clerk-Steno II, 803 East Browing, Marion, Ill.
Priscilla Nicholson, Clerk-Typist I, 1216 East Oak, West Frankfort, Ill.
Elsworth Shepherd, Lab. Helper, Route 2, Thompsonville, Ill.
Arno Stiritz, Lab. Helper, 410 West Tenth, Johnston City, Ill.
Jesse Garrett, Lab. Helper, Route 2, West Frankfort, Ill.
Zudora Hadfield, Lab. Technician II, 603 Future Drive, Marion, Ill.

MINE RESCUE STATION ACTIVITIES

1958

On April 3, 1958, about 8:15 a.m., the Benton Mine Rescue Station No. 1 and No. 2 Rescue teams were called to assist in putting out a belt fire at the Freeman Coal Mining Corporation No. 4 mine, located at Marion. The teams did not go below and both teams were back to their respective stations at approximately 11:00 a.m.

On December 5, 1958, the Superintendent of the Freeman Coal Mining Corporation No. 4 mine at Marion called the Benton Mine Rescue Station No. 1 and No. 2 Rescue teams to put out a belt fire; however, when the teams arrived, they were told by the Superintendent that the fire was put out but to stand by until another check was made on the fire. The Superintendent of the mine released the teams at approximately 9:45 p.m. and both teams were back at the station at approximately 10:45 p.m.

DIVISION OF OIL AND GAS

The Division of Oil and Gas of the Department of Mines and Minerals is required to enforce the provisions of "An Act in Relation of Oil, Gas, Coal and Other Surface and Underground Resources," and the Rules and Regulations formulated pursuant to the provisions of the Act.

It is the duty of the Division to see that oil wells are properly spaced; to control the drilling and plugging of oil wells and wells drilled in connection therewith; to see that necessary precautions are observed to protect the workable coal seams through which wells are drilled and to prevent pollution of land and fresh water supplies resulting from oil field operations.

Permits must be obtained from the Division of Oil and Gas before wells are drilled for oil, gas, watersupply, water input, gas input, air input, salt water disposal, and structure test. In 1958, 4,251 such permits were issued. The Law requires that for each well drilled or acquired, the operator must furnish the Division with bond coverage to guarantee the eventual plugging of the well and the satisfactory restoration of the well site. The State oil well inspectors are in attendance to supervise the plugging of all abandoned drill holes, which in 1958 numbered 1,923.

The Division furnishes copies of permits and plugging affidavits to the State Geological Survey, and is charged with the responsibility to seeing that well logs and cuttings are sent to the Survey. The Division also receives and records completion data on wells drilled.

The Rules and Regulations of the Division provide for the calling of public hearings, upon written request of any interested person, for the purpose of taking action with regard to any matter within the jurisdiction of the Department. All such hearings are made of record in the Division and are open to public inspection.

The Oil and Gas Board consists of four members and the Director of the Department, and is subject to call by the Mining Board for advice and consultation on matters pertaining to the oil and gas industry.
